

Training Parameters in PyTorch

LATEST SUBMISSION GRADE

100%

1. What does the following line of code do :

```
w.grad.data.zero_()
```

- ☐ update parameters
- ☐ calculate the iteration
- ☒ zero the gradients before running the backward pass

1 / 1 point

✓ Correct
correct

2. What does the following line of code do :

```
loss.backward()
```

- ☐ update parameters
- ☒ compute gradient of the loss with respect to all the learnable parameters
- ☐ zero the gradients before running the backward pass

1 / 1 point

✓ Correct
correct
