

1. What are Machine Learning Pipelines?

1 / 1 point

Please choose all correct answers

☒ A way to do feature engineering within the pipeline framework

✓ **Correct**
Correct

☐ A way of making ML algorithms run faster

☒ A way of expressing your complete end-2-end machine learning flow within a single framework with a homogeneous API

✓ **Correct**
Correct

☒ A way of speeding up ML development

✓ **Correct**
Correct

2. How is the class called which transforms a string class label to a class index in SparkML?

1 / 1 point

☐ OneHotEncoder

☐ Bucketizer

☒ StringIndexer

☐ VectorAssembler

✓ **Correct**
Correct

3. What is the class called which transforms a set of columns in a data frame to a single DenseVector representation in SparkML?

1 / 1 point

☐ Bucketizer

☐ OneHotEncoder

☐ StringIndexer

☒ VectorAssembler

✓ **Correct**
Correct
