# Training and Validation Data PyTorch

**LATEST SUBMISSION GRADE**

## 100%

1. Training data is used to train the model; validation data is used to obtain what?

○ The reduced model variance

◉ Hyperparameters

○ A test of how good the model performs in the real world

✓ **Correct**
  correct

2. **Data validation is used**

◉ find the values of hyperparameters

○ fit the parameters

✓ **Correct**
  correct
